Vo Hoang Tuan

Software Developer

Name Võ Hoàng Tuấn

Birth 13/07/2004

Email vohoangtuan1980t@gmail.com

Address TP. HCM, Viet Nam

Điện thoại 0386006085

Portfolio https://vohoangtuan.id.vn/

Overview & Career Objective

With a deep passion for technology and a strong foundation in Software Engineering, I strive to combine machine learning and web development to build optimal software. I am seeking a professional environment where I can leverage data technologies to develop scalable, high-performance systems that deliver practical value.

Education

2022 - 2027

Thu Dau Mot University (TDMU)

Major: Software Engineering

GPA: 8.6 / 10.0

Honors: Awarded Academic Merit Scholarships 8 semesters.

Scientific Research (2026): Co-authored a National Scientific Research Paper titled "*Building a Real Estate Recommendation Model Based on Content Features and the k-Nearest Neighbors Algorithm*".

Awards & Certifications

Foundations of Coding Back-End Certificate:

- Issued by: Microsoft on Coursera
- Date: May, 2025
- Completed a comprehensive program covering foundational backend development principles on the Microsoft stack.
- Link: https://www.coursera.org/account/accomplishments/verify/W6IAMCA39TL5

Amazon Web Services – MiAI (2025)

- Issued by: UdemyDate: Oct. 21, 2025
- Credential ID: UC-98ccc48d-a709-4f03-9c27-890d6a421387
- Credential URL: ude.my/UC-98ccc48d-a709-4f03-9c27-890d6a421387

Certificate of Participation, UCPC 2023 UIT University

- Issued by: UIT University
- Date: 2023
- Competed in a team-based, timed programming contest, solving complex algorithmic challenges.

Technical Foundations

- **Backend & Architecture:** C#, .NET 8 (ASP.NET Core API, MVC), Clean Architecture, SOLID Principles, RESTful APIs, and Entity Framework Core.
- **Data & AI:** Python, BigData Analysis, Machine Learning, Deep Learning fundamentals.
- **Frontend & Mobile:** React, TypeScript, Flutter, HTML/CSS, Tailwind CSS.
- **Databases & Cloud:** SQL Server, PostgreSQL, Firebase, basic AWS Cloud.
- **Tools & Methodologies:** Git/GitHub, Agile/Scrum concepts.

Projects

KGS - Real Estate Valuation Platform

(Personal Project)

Category	Details
Repository	https://github.com/Vohoangtuanhdhtdm/Project_KGS.git
Description	A PropTech system that provides real estate valuation and recommendations using a robust Client-Server architecture.
My Role	Fullstack
Key Responsibilities	• Developed a robust Backend API using ASP.NET Core to serve real-time property price predictions. • Practiced integrating machine learning models into the web application, bridging data science with web development. • Connected the backend seamlessly with a React frontend to ensure low-latency data rendering for users.
Technology Stack	ASP.NET Core API, React, SQL Server, Python, Machine Learning.

Health Insurance Fraud Detection

(Big Data Coursework)

Category	Details
Repository	https://github.com/Vohoangtuanhdhtdm/Budget-Waste-Fraud-Detection-System-Based-on-Big-Data-and-Peer-based-Anomaly-Detection.git
Description	A Big Data analysis pipeline designed to process nearly 10 million medical records and identify potential insurance fraud patterns.
My Role	Data Analysis
Key Responsibilities	• Explored and processed a large-scale dataset (CMS) using Apache Spark (PySpark) to understand big data distributions. • Applied PCA (Principal Component Analysis) to reduce dimensionality and detect anomalies breaking natural distribution rules. • Utilized Linear Regression algorithms to estimate reasonable revenue benchmarks and flag suspicious medical billing behaviors.
Technology Stack	Apache Spark (PySpark), Python, Machine Learning (PCA, Linear Regression).

GoGo Course Platform

(Personal Project)

Category	Details
Repository	https://github.com/Vohoangtuanhdhtdm/GoGo.Api.git
Description	A robust E-Learning Backend API designed strictly following Clean Architecture and SOLID principles for high scalability.
My Role	Backend Developer
Key Responsibilities	• Designed and implemented a modular architecture using Clean Architecture (Domain, Application, Infrastructure, Presentation layers). • Developed RESTful APIs to handle core business operations ensuring separation of concerns. • Applied SOLID principles to improve maintainability, making the codebase highly testable and easy to extend.
Technology Stack	C#, ASP.NET Core API, Entity Framework Core, SQL Server.

Meditation Voice AI App

(Academic Project)

Category	Details
Repository	https://github.com/Vohoangtuanhdhtdm/app_mental_health_care.git
Description	A cross-platform mobile application supporting mental health, featuring an interactive voice-based AI assistant.
My Role	Mobile & Backend Developer
Key Responsibilities	• Collaborated to develop a responsive and smooth UI/UX using the Flutter framework. • Experimented with integrating a voice-based AI agent via a Node.js backend to provide personalized meditation guidance. • Managed real-time data and secure user authentication using Firebase.
Technology Stack	Flutter, Firebase, Node.js API, Voice AI integration.

CuaHangVHT - MVC E-commerce Website

(Personal Project)

Category	Details
Repository	https://github.com/Vohoangtuanhdhtdm/CuaHangVHT.git
Description	A complete, server-rendered fashion e-commerce website built from the ground up using the traditional Model-View-Controller pattern.
My Role	.NET MVC Developer
Key Responsibilities	• Developed a full-featured e-commerce platform using ASP.NET Core 8 MVC with Razor Views for server-side UI rendering. • Implemented core functionalities, including a product catalog, dynamic shopping cart, checkout process, and order management. • Integrated ASP.NET Core Identity for secure user account management and cookie-based authentication.
Technology Stack	ASP.NET Core MVC, Razor Views, Entity Framework Core, SQL Server, HTML/CSS, JS, Bootstrap 5
